

Getting Results for Delaware

Putting Delaware First

We Must Hand a Managed, Livable

Environment on to Coming Generations:

- We must protect and improve the quality of Delaware's land, water and air, keeping it livable.
- Open space should be cherished and preserved, and adequate roads, schools and services should accompany any new development.

Lower Energy Prices:

- Affordable energy must be a priority.
- Energy policies should promote conservation and alternative fuels and measures to keep costs down for families and businesses.

Public Safety and Homeland Security are the Most Basic Responsibilities of Government at All Levels:

- To do so, Delaware Democrats endorse efforts to protect us from violence and terrorism.
- We will also preserve the privacy of individuals, families and businesses.

A Responsibility to Delaware's Families

A Strong Family is the Backbone of a Healthy Society:

- We must provide affordable and accessible health care for everyone.
- We must preserve Social Security for current and future generations and expand prescription drug benefits under Medicare.
- Finally, we must keep private medical decisions between patients and their doctors.

A New Era of Middle Class Opportunity:

- We want to return to a society driven by a strong working class.
- We must ease the financial strain on middle class families when it comes to education, health and childcare.

Those Who Protect Our Communities and Our Country Should Not Be Forgotten:

- Members of the active military, the National Guard, the reserves, police departments and fire companies should get the tools and training they need.
- Military veterans should be honored and rewarded for their service.

Results for the Future

Ensuring Quality Education:

- We must make a college degree just as attainable as a high school diploma.
- Tomorrow's workers should be the best educated employees in the world.
- We must improve the skilled trades, apprenticeships, and training programs that provide for the workers of today and tomorrow.

A Stronger Economy Depends on a Stable Workforce:

- We must increase opportunities for Delaware's working men and women.
- There must be fair wages for all and healthy, safe and stable working conditions for those who make our state and economy run well.

Economic Development:

- We must grow our state's outstanding small businesses and create an environment where new ones can thrive.
- We must continue to retain and attract more companies here, without becoming too reliant on any one employer.
- Delaware must retain its ranking as one of the best states to do business.
